

YTS On the Road!

Taking science around Tasmania so you can find out what scientists *really* do!

The YTS are on the road again this year, on three separate roadshows, visiting schools around the state, from Burnie to Blackmans Bay. Be prepared to be amazed and inspired as they share their stories about what they do and why they do it!

Roadshow One

Northwest Tasmania 3 - 5 August

Who's Going:

Anne Garrett - Helping communities move forward...

Nikki Dinn - Starting the fire - The influence of fire on native invasive species

Dave Carpenter - Look! There on that log, is it a plant? Is it an animal? No! It's a fungus!

Tanaz Jungalwalla - "If you can't stand the heat" - Effects of climate change on lizards

Roadshow Two:

Southern Tasmania 10 - 12 August

Who's Going:

Ben Arthur - The secret life of seals

Clare Smith - Antimalarial treatment research

Courtney Jones - The structure of the Milky Way (no, not the chocolate one!)

Dave Carpenter - Look! There on that log, is it a plant? Is it an animal? No! It's a fungus!

Jennifer Lavers - Impacts of marine debris on Australian seabirds

Jessica Collins - Saving our skin!

Jess Andrewartha - Fast water, brown slime and hydropower!

Laura Wiczorski - How can blood cells help fight malaria?

Lila Landowski - Growing nerves!

Nick Blackburn - Motor neuron disease - finding a therapy

Nikki Dinn - Starting the fire - The influence of fire on native invasive species

Roadshow Three:

The North. 24 - 26 August

Who's Going:

Ben Arthur - The secret life of seals

Anne Garrett – Helping communities move forward...

Tanaz Jungalwalla – “If you can’t stand the heat”- Effects of climate change on lizards

Jess Andrewartha - Fast water, brown slime & hydropower!

Dave Chapman - Look! There on that log, is it a plant? Is it an animal? No! It’s a fungus!
